

LAB2 Instructions

Please read carefully!

1. Open and start a new `tex` file.
2. Make sure you include `\documentclass[11pt]{article}` at the beginning of your document.
3. Include the following packages: `\usepackage{amsmath,amssymb,graphicx}`
4. Set the page margins by: `\usepackage[margin=2cm]{geometry}`
5. Set `\parskip` to 6pt and use no `\parindent`.
6. Use the `fancy header` package.
7. Use `\texttt{}` to produce **teletype** text.
8. Consult the material uploaded onto Moodle:
 - *LATEX for Beginners Guide (PDF)*
 - *Common Mathematical Expressions (PDF)*
